

CALL FOR
ABSTRACTS
Deadline:
3rd March 2023

10. BIONIK-KONGRESS:

„PATENTE DER NATUR“

12th & 13 th May 2023 in Bremen, Germany

The national congress on Biomimetics / Bionics is an established conference on biomimetic research and development and takes place at the City University of Applied Sciences in Bremen since 2004. It is organized by the Gesellschaft für Technische Biologie und Bionik (GTBB) and the Bionik-Kompetenznetz e. V. (BIOKON) and the Bionik-Innovations-Centrum (B-I-C). As a national conference, the conference language will be German, but contributions in English are heartily welcomed as well.

The symposium is open to the entire spectrum of bionic activities. Biologists, technicians, bionics scientists, bionics students, companies and people interested in bionics from all disciplines are invited to participate.

Projects can be presented at all stages of development. The spectrum ranges from basic research to innovative products and patents ready for series production. Forms of contribution are oral presentation, poster or exhibits. To register for oral presentations and posters, in addition to author(s) and title, an abstract of approximately 300 words must be submitted by **March 03, 2023**. Information on acceptance will be provided by March 14, 2023.

The format for the scientific posters is DIN A0 in panel format. These will be exhibited at the congress and presented in plenary poster sessions as part of the lecture program. For the poster presentation the poster author(s) will be allowed to give a 3 minutes long talk (exactly!), which will be done with the help of a PowerPoint presentation (2-3 slides). In the context of this scientific poster presentation, the GTBB will award the best poster with a certificate and prize money. In addition, the congress participants will select one poster for the GTBB Public Poster Award, which also comes with a certificate and prize money.

Registration for the congress and the application of a contribution is possible via our website in German language at the following link:
