

11. BIONIK-KONGRESS „PATENTE AUS DER NATUR“

CALL FOR ABSTRACTS

The symposium is open to the entire spectrum of biomimetic activities and will take place on 24 and 25 October 2025 at the research and technology centre ECOMAT in Bremen.

Biologists, engineers, biomimetic scientists, biomimetics students, companies and anyone interested in biomimetics from all disciplines are invited to attend.

PRESENTATIONS - POSTER - EXHIBITS

Projects can be presented at all stages of development. The spectrum ranges from basic research to innovative products and patents ready for series production. Contributions can take the form of presentations, posters or exhibits. In addition to the author and title, an abstract of max. 300 words must be **submitted by 15 July 2025** for the registration of presentations and posters. Information on the acceptance of contributions will be provided by 21 July 2025 at the latest.

The language of the contribution's title (English or German) determines the overall language of the contribution. There is a time slot of 20 minutes per presentation, including discussion. The format for the scientific posters is DIN A0 in portrait format. These will be exhibited at the congress and presented in plenary poster sessions as part of the presentation programme. For the poster presentation, the poster authors will have 3 minutes (exactly!) to speak using a PowerPoint presentation (2 slides). As part of this scientific poster presentation, the Society for Technical Biology and Biomimetics GTBB e.V. will award the GTBB poster prize. In addition, the congress participants will honour one poster with the GTBB Audience Poster Prize. Both are associated with a certificate and prize money.

Registration for the congress and the registration of a contribution is possible via our website under the following link:
